Thursday, March 17 7:00 PM

Internet SIG Firefox.

The meeting will again feature Firefox, the new browser on the scene. We will demonstrate the tweaks that the experts recommend.

CompUSA - South Boulevard & I-485

The **PC Club of Charlotte** is the only computer user's group in the Charlotte area that caters to the everyday computer user. Some of our members are computer professionals; most are just normal people like you and me. Our members welcome the chance to meet others using computers, help with troublesome programs or hardware, introduce new technology and discuss the current issues that affect the Internet and computer users in general. **Come join us!**

We wish to welcome all novices, new users, power users and any one in-between to join us in **2005** to make this year the best for the PC Club of Charlotte.

Become a Member of The Personal Computer Club of Charlotte
It's Easy, and Best of All It's Only \$15.00 Per Year!

Third Monday of the Month 7:00 PM

Microsoft Office SIG
The Microsoft Office SIG will not meet this month.

Please send your suggestions for future topics and join us on the Forum. We are starting over at the beginning, especially for business users, in June or July. Tell your friends and coworkers here's an opportunity to be more productive on the job. More details at <http://pc3.org/sigs/sigoffice/>.

CompUSA - South Boulevard & I-485

Thursday, March 24 7:00 PM

Digital Camera SIG
An open forum.

The next digital camera SIG will be April 28th (the 4th Thursday of each month). Go to pc3.org for location details. The program will be an open format. I will answer all of your digital camera questions and any digital editing questions that you might have. Please bring your cameras and images burned to CD ROM.

Digital Camera SIG

First Wednesday of the month

Web Design SIG

The Web Design SIG is on temporary hiatus. Please leave your comments and questions at the [forum](#).

Thursday, May 12 7:00 PM

General Meeting
Smart Computing Magazine

Amber Coffin from Smart Computing in conjunction with the PC3 will present a workshop to guide us through Smart Computing and put an end to the nerve racking game of find the feature in Windows. For more details, read the preview in this month's *eBytes & Bits* or [click here](#).
